1 Shelf Installation

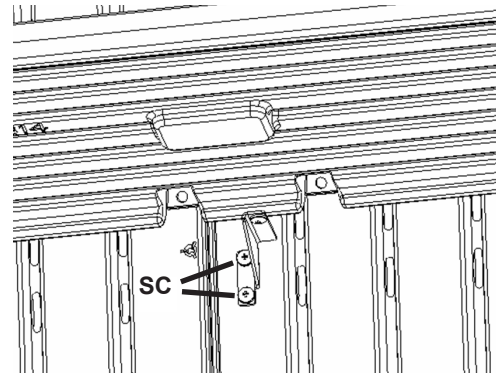

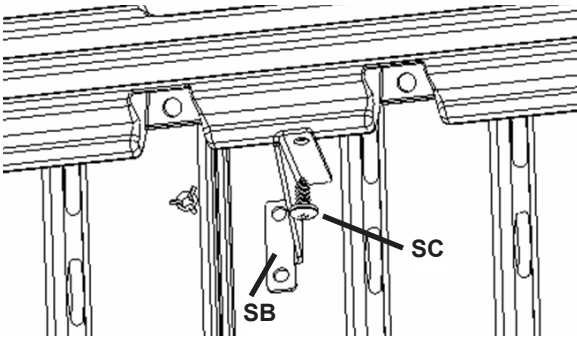

1a Insert Shelf Brackets (SA) into notches in any Wall Support Channel. Place the Shelves on brackets and secure with #10 screws (SC) and #10 Washers (SD).

Insert Brackets into the inside set of slots on the Wall Channels. Otherwise Brackets will be too far apart to support shelves.

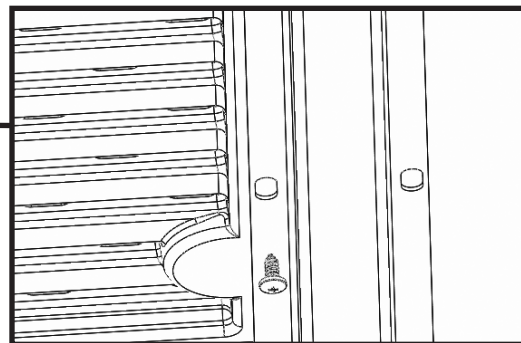

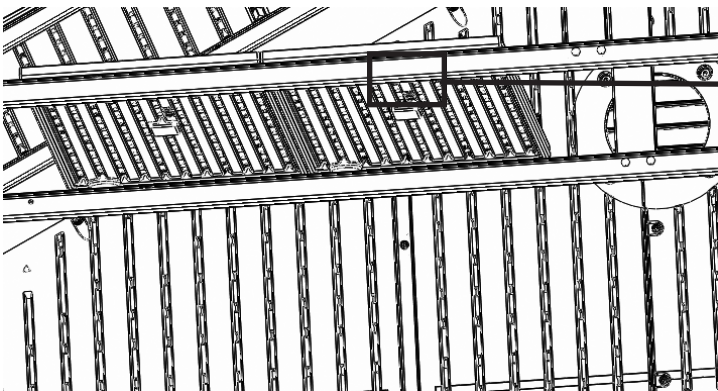

1b Install a Back Shelf Bracket (SB) to each Shelf with a #10 screw (SC). Line up the Bracket so that it will connect to the wall in between grooves. Attach it to the bottom of the shelf. Then screw the Bracket into the wall.

Alternate Shelf Location

1c Shelves may also be installed in between trusses to provide overhead storage. Rest a shelf between two trusses. Attach shelf to Truss Channels through slotted holes in channels.

The shelves fit length wise inbetween the Trusses.

Note: This is an interior upward view.
